HSL S – STAYING POWER

# HSL S – STAYING POWER

A person is running in a desert landscape, with sand being kicked up by their foot. The person is wearing black leggings and brown running shoes. The background shows rolling sand dunes under a clear blue sky. The foreground is a sandy, rocky desert floor with some sparse, dry vegetation.

## SUPERIOR YIELD

A new level of output through state-of-the-art technology. The advanced four-busbar cell design efficiently converts sunlight into electricity, even under challenging conditions.

## LONG-TERM DURABILITY

Resists aging effects. Fully automated processes and high-quality materials result in excellent module longevity, including verified resistance against potential induced degradation (PID).

## RESILIENT LIGHTNESS

Strong yet light. The high-tech module frame has been designed to withstand very high mechanical loads while still keeping module weight at a minimum.

## PROVEN QUALITY

Tested. Verified. Guaranteed.

As a global top-ten PV module supplier, Hanwha Solar powers successful solar projects worldwide.

## CERTIFIED AND GUARANTEED

Our solar modules comply with international regulations and are backed by industry-leading warranty terms.

- Shipped in protective packaging
- Power Controlled by TÜV Rheinland

### HSL 60 S Poly

Robust yet light, the high-yield 60-cell module is a popular choice for rooftop installations.

### HSL 60 S Poly Black Edition

High-power modules with sleek aesthetics meet the demands of design-conscious customers.

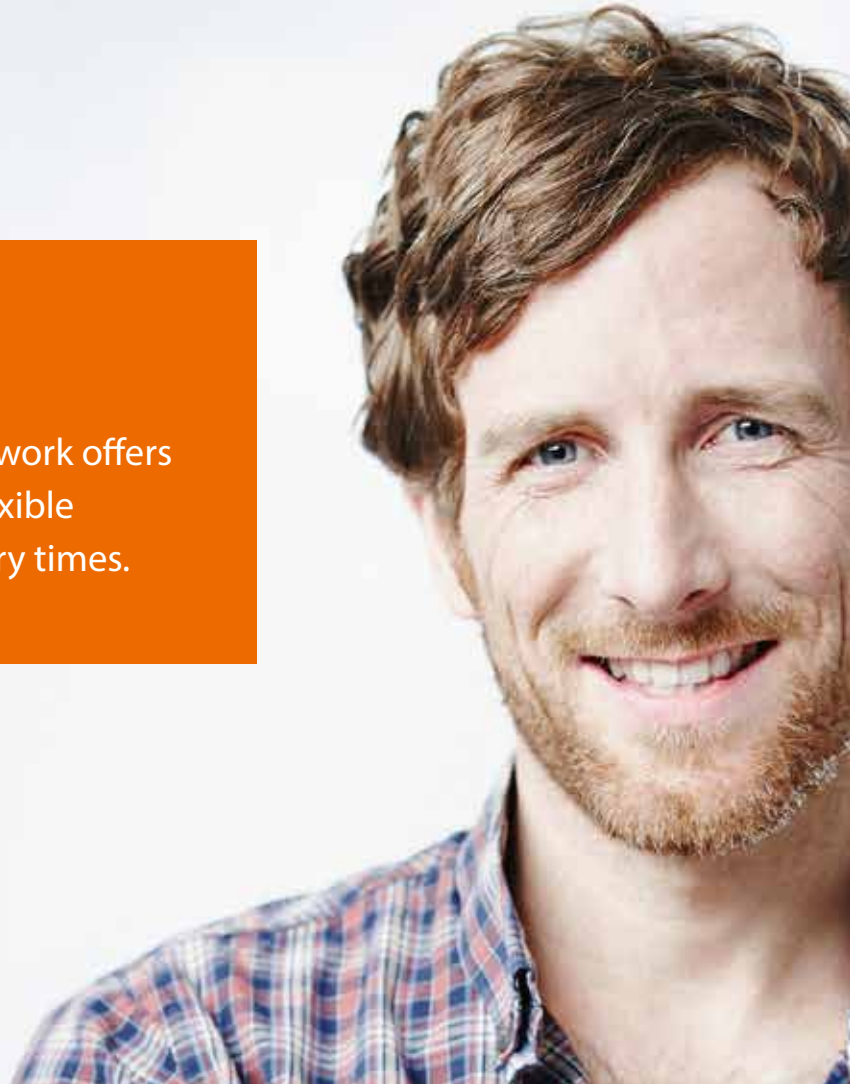

### HSL 72 S Poly

High yield and outstanding protection against degradation effects enable the 72-cell poly module to offer developers and investors a reliable return.

## READY AVAILABILITY

Global footprint. Local presence.  
Hanwha Solar's worldwide sales network offers local pre-and after-sales services, flexible ordering processes and short delivery times.

## ABOUT HANWHA SOLAR

Hanwha Solar is a leading supplier of photovoltaic modules and is backed by the strength and resources of Korea's Hanwha Group, a Fortune Global 500 corporation.
